Echo H2 Server

Frequently Asked Questions

About the H2 Server

- **Under sink unit, requires a Echo Server faucet or reverse osmosis faucet**
- **Connects with reverse osmosis and house filtration systems**
 - **Previous filtration is required**

- **How do I install it?**
 - Start by removing the two white plugs in on the top of the machine. Use the white plastic tool in the accessory box for extra leverage
 - Connect blue and white pressure reducer into the IN port
 - Connect mineral energizer into the OUT port (Optional)
 - Connect faucet water line to the OUT port
 - Plug the H2 Server into power outlet
- **What is the mineral energizer?**
 - The mineral energizer is an optional accessory which adds healthy minerals into the water
- **What are the white circle ports on the side of the H2 Server?**
 - Those are for decoration. You don't need to connect anything to those ports
- **What are the things in the accessory box for?**
 - Blue and white pressure reducer
 - White plastic lever
 - Power cords
 - Mineral energizer (optional)
